# PATHWAYS NEWS

**December:** Winter Break is Dec. 16-Jan. 1. See you in the new year Jan. 2!

## A note from the teacher:

Hello!

If your student has missed extensive days of school, winter break is an excellent time to complete a project. There are many competencies that are best evaluated in person, but a short winter project can help make up for the lack of progress from missed days.

If your student is in need of a winter project, he or she will bring home the project plan this month.

Let me know if you have questions!  
Mrs. Hargrave

## Upcoming events:

- Nov. 28 Report cards mailed
- Dec. 13 Baking treats for teachers
- Dec. 15 Pastries with Graduates
- Dec. 15 Holiday Party and last day before winter break .

## Field Trip to the MAC

## Stay in touch :

Please allow for 24 hours for a response.

# Spotlight on Mentorships

Phillip Wills is working with the school district's transportation department doing maintenance and shop related duties. He spends most of his time in coveralls. Because of his time working on busses, Phillip is interested in becoming a diesel mechanic. In the classroom, Phillip has become our newly appointed shop manager and is in charge of all mechanic projects and equipment.

"Side Projects" happening daily:  
Making bread, baking dessert, organizing events, creating cards, planning classroom events, cleaning, or short term volunteering when needed throughout the district! Alex checking for breathing during CPR at at the first aid class Daya organized.

## Attending College post Pathways:

A Pathways diploma allows your student to pursue post high school training or a degree from a college! Pathways' transcripts are based on the same format as several Big Picture schools in Washington, meaning that college admissions offices have seen these competency-based transcripts before. Most need just the diploma to start at the Community Colleges of Spokane.

There are steps to take now to make entrance into a college program easier. If your student is interested in 4 year programs, they need to get through Algebra 2 and a foreign language. There are different ways to make this happen!

- Take a course at the high school.
- Study to proficiency and take a competency test
- Complete a project that has an Algebra 2 equivalency (like Delta Math independent study).

Students need to plan ahead to start these options in their junior and senior year.

## Reminder:

It is cold out there and teens are not the greatest when planning ahead for the weather. Gloves, hats, scarves, and coats allow students to go outside during break time!

Resources your students are using:

canva.com for creating communication (flyers, ads, etc.)  
Adobe for photography editing  
Health Department Food Handlers card website
