

LINCOLN COUNTY PATHWAYS NEWS

March

Mar. 29, no school, unless a conference is required or attendance is an issue.
Spring Break is April 1st-5th

A note from the teacher:

Hello all,

February was particularly full of guest speakers! The prosecuting attorney, Adam Wasler, and the secretary for the district attorney's office, Tami Odenrider, were in, as was a cybersecurity expert from Grand Coulee Dam, Keith Rinaldi. Earlier in the month Nick Young, a pilot and mechanic, visited. All of these community members brought a wealth of knowledge to the classroom!

We have several off-campus learning experiences planned in the next few months.

Mrs. Hargrave

Upcoming events:

- March 4 Class Pictures (New date)
- March 13 Open House Exhibitions
- March 20 Trip to a wildlife refuge
- March 27 Professionals visit
- March 29 Individual conferences for those at risk of not leveling up

Spotlight on Student Work

Zephrin Knight coordinates with our district IT department to fix broken student chromebooks.

Additionally, Zephrin is teaching others in the classroom about computers and their components.

Preparing for the CompTIA A+ certification is on Zephrin's to do list as well as learn more about computer technician work. Eventually, he would like to expand into an internship in an IT department in the community to get a second perspective on IT support work.

Mark the calendar!
March 13 Open House 6-7pm,
student exhibitions
(science fair style)

Information:

Earth Day is April 22nd.

We are planning a community service day with the Lincoln County Conservation District.

This is part of Trinity's project and pursuit of a career in environmental sciences.

Working at Home:

While there is no work assigned for completion at home, there are activities that students should consider, especially if they miss days. Working on autobiographies, improving student learning plans, entrepreneurship opportunities, and natural extension of projects are encouraged. For example, if someone was interested in computer programming, time spent designing an app or learning to code could be added to an exhibition and be used to demonstrate competencies.

Hobbies and pastimes can make a great project if a student is learning and pursuing interests with the guidance of experts.

General Info.

Monday mornings advisory is now Public Speaking! Students are chosen at random and given a random topic. They then have 60 seconds to plan for a 90 second speech. Classmates give them feedback so they can earn a higher score in the next round.
